

De-Graft Kofi Obeng

Accra, Ghana | dkofiob@gmail.com | dkofiob.github.io

PROFILE

Mathematics graduate and MSc Big Data Analytics candidate at the University of Ghana, with experience in research data analysis, data curation, and undergraduate mathematics teaching. Research interests include graph representation learning, spectral and geometric methods, self-supervised learning, robustness, and generalisation.

EDUCATION

MSc Big Data Analytics | University of Ghana | October 2025 - Present
In progress.

BSc Mathematics | University of Ghana | January 2021 - July 2025
Second Class Honours (Upper Division). Valedictorian, Class of July 2025.

EXPERIENCE

Data Analyst (Research & Curation) | Pivot57 | October 2025 - Present
Source and catalogue research data; clean and standardise datasets; document metadata and sources; perform quality checks and prepare data for analytics pipelines.

Graduate Teaching Assistant | University of Ghana | September 2025 - Present
Support undergraduate mathematics teaching in Algebra and Trigonometry and Calculus I under Dr. Collins Allan.

Teaching Assistant | University of Ghana | October 2024 - September 2025
Supported mathematics teaching, tutorials, individual student assistance, and assessment.

SELECTED COMPLETED PROJECTS

Spectral Properties of Trees - Undergraduate thesis on graph structure and eigenvalue spectra. Supervisor: Dr. Kenneth Dadedzi. Full thesis available on request.

Applications of Eigenvalues and Eigenvectors in Differential Equations - Applied mathematics project. Supervisor: Dr. Kenneth Dadedzi. Full document available on request.

Modulo Arithmetic and RSA Complexity - Applied cryptography project. Supervisor: Dr. Ralph Twum. Full document available on request.

SKILLS

Python, R, data cleaning and curation, metadata documentation, quality assurance, linear algebra, graph theory, calculus, teaching, and technical writing with LaTeX.

REFERENCES

Available on request.
